

Rahul Agrahari

Senior Android Engineer | Kotlin | Jetpack Compose | Compose Multiplatform | Android Architecture | Android AI Skill | Claude Code Cli | Codex Cli

Contact: +91-8787043523 | Email: android.rahul.agrahari@gmail.com

PROFESSIONAL SUMMARY

Senior Android Engineer with 11+ years of professional experience designing, developing, modernizing, and maintaining scalable Android applications across Media, Retail, Public Safety, Education, and Location-Based Advertising domains.

Experienced in building and enhancing production applications with 10M+ downloads, with strong expertise in Kotlin, Java, **Jetpack Compose**, **Compose Multiplatform (CMP)**, **Coroutines**, Flow, **MVVM**, MVI, Clean Architecture, **Dagger/Hilt**, Room, DataStore, and Android Architecture Components. Strong experience in Android application modernization, feature ownership, production issue resolution, and cross-platform development, including SharedPreferences to Jetpack DataStore, XML to Jetpack Compose, and native Article Comments implementation to Compose Multiplatform with shared UI and business logic for Android and iOS.

Proactively leverages AI coding agents and assistants (**Claude Code Cli**, **Codex Cli**) as part of the daily development workflow — for code generation, refactoring, debugging, writing unit/UI tests, PR reviews, documentation, and technical research — improving development speed, code quality, and overall team productivity

EDUCATION

Master of Computer Application (MCA) — MJP Rohilkhand University (Campus), 2010 - 2013

PROFESSIONAL EXPERIENCE

Senior Software Engineer — Times Internet

May 2022 – Sep 2026

- Contributed to the development and modernization of the **Times of India (TOI)** Android application and its regional-language variants, built on a shared, scalable codebase collectively serving **20M+ downloads**.
- Owned the Article Detail and Article Comments modules, driving feature development, architecture improvements, and production issue resolution.
- Led the migration of the **Article Comments module to Compose Multiplatform (CMP)**, implementing shared UI and business logic for both **Android and iOS**, reducing duplicate development and maintenance effort.
- Designed and implemented the SharedPreferences to **Jetpack DataStore migration**, ensuring seamless data migration, backward compatibility, and zero data loss for existing users.
- Modernized the Games module by **migrating legacy XML-based UI to Jetpack Compose**, improving maintainability and simplifying future UI development.
- Developed and enhanced key Article Detail capabilities including Search, Recipe Detail, Bookmark, Photo Gallery, and custom Picture-in-Picture (PiP) video playback.
- Contributed to multiple areas of the TOI application, including the Home/News Listing page revamp, feature enhancements, and production fixes.**
- Investigated and resolved production issues reported through **Firebase Crashlytics**, contributing to application stability and improved user experience.
- Proactively adopted **AI coding agents (Claude Code, Codex)** into daily workflow for **Pull Request reviews, feature implementation, and code optimization** — accelerating development cycles while maintaining code quality and architectural consistency.
- Performed Pull Request reviews for fellow Android engineers within an 8-member Android development team, contributing to code quality, architecture consistency, and engineering best practices.
- Collaborated closely with Backend Engineers, Product Managers, QA Engineers, and other cross-functional teams throughout feature design, development, testing, troubleshooting, and release.

Senior Software Engineer — GlobalLogic India Pvt. Ltd. (A Hitachi Company)

Aug 2019 – Apr 2022

- Worked on the **Kohl's Shopping Android application**, a large-scale retail application with **10M+ downloads**, contributing to feature enhancements and application improvements.
- Developed and enhanced Android features based on evolving business and product requirements.

- Investigated and fixed application bugs and production issues, contributing to application stability and improved user experience.
- Collaborated with cross-functional teams to understand requirements, resolve issues, and deliver production-ready features.
- Also contributed to the Bridge International Academies Android application, supporting school-management workflows across Kenya, Uganda, Rwanda, Nigeria, and India.
- Worked on functionality covering student lifecycle management, teacher scheduling, attendance tracking, assessments, and report cards.

Senior Member Technical Staff — NEC Technologies India Pvt. Ltd.

Jul 2018 – Aug 2019

- Built the Passport eKYC Android application presented by NEC Corporation at MWC 2019, Barcelona.
- Implemented capabilities including **OCR-based document scanning**, biometric authentication, identity verification, and secure payment functionality.
- Designed and implemented a **Proof of Concept for Honda's IVI Virtual Assistant**, supporting voice-driven navigation, hands-free communication, and in-car voice interactions.
- Successfully demonstrated the prototype to the client and contributed to its approval for the next phase of development.

Android Developer — RNF Technologies

Oct 2016 – Jun 2018

- Developed production Android applications across Public Safety and Location-Based Advertising domains.
- Implemented GPS-driven dynamic advertising for the RidePlay platform, enabling location-aware content delivery and automatic advertisement refresh based on vehicle location.

Android Developer — Inficare Technologies

Sep 2013 – Sep 2015

- Developed Android applications using **Java and Android SDK**, contributing to feature development, bug fixing, and application maintenance.
- Worked with the Android application lifecycle and integrated **RESTful APIs** for application functionality.

CORE TECHNICAL SKILLS

Languages: Kotlin, Java

Android: Android SDK, Jetpack Compose, Android Architecture Components, Room, Jetpack DataStore, WorkManager, FCM, Background Services

Architecture: MVVM, MVI, MVP, Clean Architecture

Concurrency: Kotlin Coroutines, Kotlin Flow, RxJava

Dependency Injection: Dagger, Hilt

Networking: Retrofit, Ktor, REST APIs, HTTP

Cross Platform: Compose Multiplatform (CMP), Kotlin Multiplatform (KMP)

Testing & Debugging: Unit Testing, Android Profiler, Layout Inspector, Firebase Crashlytics

AI Tools: Claude Code Cli, Codex Cli, AI Skill
